

# Seismic Design of Buried and Off-Shore Pipelines

Michael J. O'Rourke  
Xuejie Liu

MCEER-11-MN04

# Seismic Design of Buried & Offshore Pipelines

## Table of Content

Chapter 1: Seismic Hazards and Pipeline Performance in Past Earthquakes

Chapter 2: Permanent Ground Deformation Hazards

Chapter 3: Wave Propagation Hazards

Chapter 4: Pipe Limit States and Failure Criterion

Chapter 5: Pipe-Soil Interaction

Chapter 6: Response of Buried Continuous Pipelines to Longitudinal PGD

Chapter 7: Response of Buried Continuous Pipelines to Transverse PGD

Chapter 8: Response of Buried Continuous Pipelines to Faulting

Chapter 9: Response of Segmented Pipelines to PGD

Chapter 10: Response of Buried Continuous Pipelines to Wave Propagation

Chapter 11: Response of Segmented Pipelines to Wave Propagation

Chapter 12: Seismic Fragility Relations for Buried Pipe

Chapter 13: Countermeasures to Mitigate Seismic Damage

Chapter 14: Design Examples

Chapter 15: References
